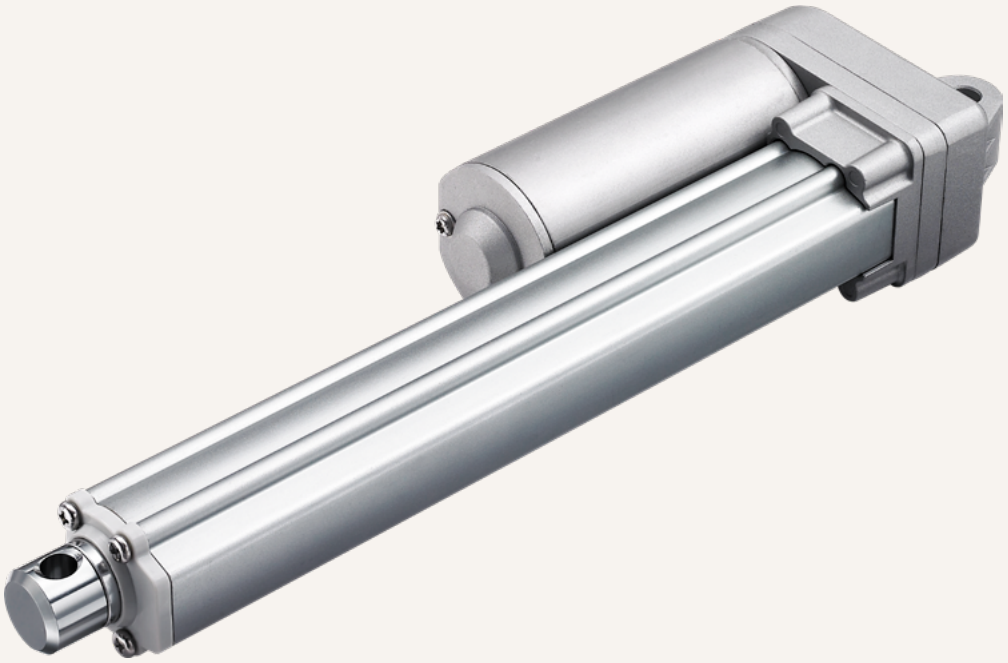
TA2P

series



Product Segments

- **Industrial Motion**

Both the TA2 and the TA2P are compact, robust, and capable of performing well in certain outdoor environments. A more powerful motor makes the TA2P capable of handling load ratings up to 3500N (787 pounds) while retaining its compact size. In addition to the high power motor, the TA2P linear actuator is available with multiple choices for feedback sensors.

Note

1 Please refer to the approved drawing for the final authentic value.

2 This self-locking force level is reached only when a short circuit is applied on the terminals of the motor. All the TiMOTION control boxes have this feature built-in.

6 The current & speed in table are tested with 24V DC motor. With a 12V DC motor, the current is approximately twice the current measured in 24V DC. With a 36V DC motor, the current is approximately two-thirds the current measured in 24V DC. Speed will be similar for all the voltages.

7 The current & speed in table are tested when the actuator is extending under push load.

8 The current & speed in table and diagram are tested with a stable 24V DC power supply.

9 Standard stroke: Min. ≥ 20mm, Max. please refer to below table.

C, H	≤ 1000	600
D, K	≤ 1500	500
E, L, T	≤ 2000	450
S	≤ 3500	300
